

## **Structural Designer – POS – Sudbury, Suffolk**

A fantastic opportunity to join a highly innovative and progressive POS manufacturer and produce creative structural design for some of the UK's leading brands.

You will be responsible for creative structural design from concept for the POS sector.

Key day-to-day tasks include:

- Liaising with clients to take briefs
- Creative, concept-driven design using Kasemake CAD
- Producing innovative POS design including FSDU work
- Technical drawings, sample making and production of mock-ups
- Liaising with production to ensure that design is manufactured accurately
- Ensuring POS photo library is maintained
- Taking jobs from initial concept to completion for blue-chip client base

The successful candidate will have previous experience working in a POS design environment.

Key attributes include:

- Full CAD literacy with preference given to Kasemake
- Ability to interpret briefs and produce innovative solutions
- Creative flair and strong attention to detail
- Effective written and oral communication skills
- Confidence in dealing with customers
- Excellent experience working in corrugated
- Ability to work as part of an established team

This is a fantastic opportunity to join a highly innovative, well established creative manufacturer.

The position attracts a competitive salary.
